# TARIFF ON LEAD MEANS VERY MUCH

Tintic Operators Urging Utah's Senators and Congressman to Stand Pat.

CONSUMER WANTS A LOWER LEAD PRICE

Producer Naturally Wants the Local Output Protected by the Tariff.

The Tintic Mine Operators' association, through its executive committee, has forwarded to Senators Smoot and Sutherland and Congressman Howoll, Utah's representatives in the National Congress, the following communication relative to the reduction proposed in the present tariff schodule on lead:

the present tariff schodule on lead:

"The miners and ore producers of Tintic mining district, Utah, urge you to use every effort with the House Committee on Ways and Means to maintain the present lead tariff schedule. Any reduction would cripple the lead mining industry of this state. The crippling of this industry would mean disaster to all occurations."

The above communication is signed by C. E. Alleu, president of the association; John Dern, vice president; George W. Riter, treasurer; Lafayette Holbrook and Harry S. Joseph, the latter being secretary.

brook and Harry S. Joseph, the latter being secretary.

A prominent mining operator stated to The Tribune yesterday that the East is in favor of a reduction of the tariff on lead. One of the arguments used by the consumers of the metal is that the American Smelting and Refining company, during the past few months, has kept the price of lead up beyond the level it should have kept in view of the general low prices of metals. This was one of the arguments used during the recent campaign in Colorado, and in answer to the same General Manager Franklin Guiterman of the Colorado department of the American company, says:

"The American Smelting and Refining company, large as it is, is and has been atterly without influence on the quotation applying to silver, copper been atterly without influence on the quotation applying to silver, copper and zine. It has, as the greatest producer of lead in the United States, lent its sustaining influence to the maintenance of lead prices and to the extent which the company has been able to sid in the creation of better prices for lead, the lead producers of the United States have shared the benefit. The quotations which are sent out as governing the price of lead by the American Smelting and Refining company are taken from the record of actual sales from week to week as made by the company, and this record is open to the inspection of any ore shipper having business with the company.

### MUCH ORE AWAITING CALL OF TINTIC PLANT

Among the mining companies that are watching closely for the Knight smelter to reach the point where it can take care of other ores than those exclusively from the Knight properties, is the Alax. The Alax has an ore contract with the Knight company, and during the past few weeks the management has been diligently at work bringing resources to the surface for the new smelter. General Manager Thomas Weir stated Wednesday morning that 750 tons of Ajax ore not awaiting the pleasure of the smelting management. From Tinite comes the word that the smelter is acting in a manner highly gratifying to those in control. Two furnaces are now eating ore. Another mine that has been giving forth a splendid enount of ore, but which awaits the Tinite smelter, is the Horn Silver of Beaver county. The Grand Central company of Tinite is another organization that will send to this plant a generous tonnage as soon as the management is ready to make the call for one. It is expected that this call will come within the next few days.

### New York Letter.

New York Letter.

James A. Pollock & Co., bankers and brokers, 6 West Second South street, furnish the following, received over their private whre yesterday afternoon:

Walker Letter, New York,—Market opened loday steady and lower; was quite heavy buying. Union Pacific and Southern Pacific were the leaders and carried the rest of the market with them In the afternoon there was an entire change, and the profit-taking was very heavy. Most of the active list declined sharply and some stop orders were reached. The close was unsettled, but we do not expect to see this reaction go very far.

### Wear the Bellmore, a hat full of value-\$3

# Chilly

Make a fellow feel the necessity of a raincoat, and since you've got to have one anyway to ward off winter storms, why not get it now?

Prudeuce says, get it here, for the sake of good looks and good values-\$15.00 to \$30.00-with the new Muto collar or the plain

Tan, gray, black or olive shades.

Our Boys' Department—a store in itself

### OHIO COPPER FEATURE ON STOCK EXCHANGE

There were several features of the trading Wednesday on the local exchange. Onlo Copper continued its spectacular rise, and sold from \$5.05 on up to \$5.30 per shure. The stock was strong in the east also, closing at \$5.50, bid in New York. Prince Consolidated was another stock to show the vigor of good times. Scattered round the beard were a few stocks that were weaker than on the proceeding day, yet these so mixed in with those that gained strength, that the sum total of business done was satisfactory. During the day 192,690 shares of stock sold, representing a market value of \$66,-7.5.60. The following were the closing unlisted and listed stock transactions:

# PIOCHE IS COMING CAMP OF COUNTRY

William G. Webber Returns From Camp Much Pleased With Properties.

LARGE AREA HIGHLY BLESSED WITH WEALTH

More Ore Scattered About District Than He Ever Saw Before.

"It is a difficult matter to properly comprehend the enormous tonnage of ore now available in the Pioche mining district. I never before at any place saw a greater amount of fine ore as Pioche has, and the best of it is, this tonnage is scattered over a very large area," said William G. Webber, general manager of the Nevada Hills company, on returning Wednesday morn-

pany, on returning Wednesday morning from the camp in question. Mr. Webber and associates have just completed a deal for Pioche property in the neighborhood of the Prince Consolidated territory.

"Pioche is a busy place," continued Mr. Webber, "and I predict that it will be a far more active district within the near future. Heretofore too much attention has been paid to such great mines as the Raymond-Ely and others close into town, while outlying properties now are among the promising ones there. I was surprised at Pioche, and believe it to be the coming camp of the country.

the country.

'I visited the Prince Consolidated.
Ohio-Kentucky, Mendha and others of
the camp, and was much impressed with the camp, and was much impressed with the resources they have in sight. The Prince mine is a wonder. The Mendha is a great big mine. I doubt if they really know the extent of the ore in the Mendha, and the group has not been scratched yet. The Ohio-Kentucky has oceans of ore. Pioche has the stamp of my approval most positively."

#### KING WILLIAM DRIFTING INTO MINERALIZED GROUND

The assay returns from the recent find of an unexpected break in the King William property of Tintic, show, as the management predicted, that it is not barren ground now that the drift is penetrating. The rock runs 2 ounces elliver and 80 cents gold per ton. These values being found so far away from the point where the best resources are expected to be has given great encouragement to the work now under way on the 1908-foot level of this property.

Metal Market.

The metal quotations for Wednesday, posted by McCornick & Co., were as foliows: Silver, 50c; lead, \$1.30; copper, 14 3-16c.

Boston Copper Market. James A. Pollock & Co., bankers and brokers, 6 West Second South street, fur-nish the fellowing, received over their pri-vate wire yesterday afternoon:

## UTAH COPPER COMES IN FOR DISCUSSION

Eastern Copper Writer Says Cost of Mining Is to Be Increased.

In hurrying by it may be well to men-tion that western circles are very much interested in a recent article appearing in the weekly George L. Walker letter relative to the Utah Copper company, Mr. Walker says:

in the weekly George L. Walker lotter relative to the Utah Copper company. Mr. Walker says:

"Utah Copper has been widely advertised this week, and has sold as high as 525c. This compares with sales at 13 a little over a year ago. Since this stock sold at very low prices I have strongly advised its purchase. At present, however, I think it a sale. It should be plain to the uninitiated even that advertisements of the character of those which appeared recently are published to sell stocks, on, and not to ald the advertiser in buying. The Guggenheim interests, who are also responsible for Yukon and American Smelting, both of which stocks were advertised and sold some time ago when selling at much higher prices, are large holders of Utah Copper. In well formed circles it is believed that these interests are paying for the Lawson advertising with a view to selling Utah Copper stock.

"The Utah Copper stock.

"The Utah Copper stock.
In the Sat is shown by the quarterly statement which the company has just issued. It has a mechanical problem before it in connection with its steam shovel mining operations, also, which will not be overcome easily, if it is overcome at all. There is good reason for the better that 75 per cent of the ore to be extracted from the immense deposit owned by this company will be taken out by the old fashioned underground system of mining, and that the cost of extraction will be 50 cents per ton more than by steam shoveling, or about 2 cents for each pound of copper. The cost of the company's copper, therefore, should be figured at 10 cents instead of 8 cents for each pound of copper. The cost of the company's copper, therefore, should be figured at 10 cents instead of 8 cents for each pound of copper. The cost of the company's copper, therefore, should be figured at 10 cents instead of 8 cents for each pound of copper. The cost of the company's copper, therefore, should be figured at 10 cents instead of 8 cents on a product

### UTAHNS HAVE GOOD LEASE AT GOLDFIELD

Well-Known Talent Expecting High-Grade Rock at Any Time Now.

That another combination of Salt Lakers is on the verge of achieving one nore triumph in the Goldfield leasing field, is vouched for by F. P. McNelli, general manager of the Goldfield Apex Mining and Leasing company. Mr. Mc-

Mining and Leasing company. Mr. McNeill is now in Salt Luke on company
business, and he states that he expects
to bring into being another leasing proposition like the Engineers or the Rogers lease. The property on which this
company owns its lease is the Golconda,
a portion of the Goldrield Consolidated
company's possessions.

From the character of the ore shown
by Mr. McNeill, it is evident that he is
working now in the same sort of rock
in which the Engineers least found its
splendid high-grade. The company is
working on the 300-foot level, going in
three different drifts in search of the
bodies of rich rock that Mr. McNeill feels
are certain to be encountered. He is
drifting both ways on an eight-foot body
of rock that will average \$8 per ton in
gold, and this is one place expected to
open up big and rich. At any time he
expects word of the find of shipping
grade ore.

The proparty is well equipped, the

expects word of the find of shipping grade ore.

The property is well equipped, the shaft being a double-compartment one, and which was driven at record speed. Mr. McNeill states that he sent this shaft down 250 feet in two months time. Among the Sait Lakers interested are lieber M. Wells, W. Mont. Ferry and Judges Marioneaux and Bradley. The company also owns some properties in Diamondfield that are finely located.

### BIG RESERVOIR BEING CONSTRUCTED IN TOOELE

The Bingham Metals company is ex-tending the dump that is making from their deep adit, across the valley of Mid-dle Canyon creek, for the purpose of credle Canyon creek, for the purpose of creating a large reservoir that will impound several million gallons of water. The tunnel itself is discharging about 1000 gallons per minute, which, with the streams heading about 1000 feet higher up the mountain, will insure a sufficiency of water to keep the basin full. The work of harnessing these streams for power purposes has been discontinued for the winter, owing to the heavy fall of snow, but will be resumed in the spring. As the company is generating from their Power Fork plant more energy than they can utilize in their operations, it is not known to what use they devise putting the added efficiency. Nor is it given out to what end the storage possibilities of the property are being developed, unless in anticipation of mining needs that may later eventuate. If the values continue into the lands of the company, as is confidently expected, it is safe to say its location will make possible an extremely low mark for production.

### SALT LAKERS OPENING UP PROMISING PROPERTY

Donald McPherson, manager of the Oneoto Mining company, is in the city on company business. The company is a Sait Lake organization, owning and operating a new but fine-looking eliverlead proposition in the Oneoto district of Nevada. Four feet of ore are now exposed, and development work is progressing smoothly and with energy. The Sait Lakers believe from all present indications that they have found a coming big producer in this group.

CANNON BALL MACHINERY SHIPPED TO PROPERTY

General Manager Edwards of the Can-non Ball Consolidated company stated Wednesday that he had just shipped to this Idaho mine the additional mil equip-ment. The company by an experiments
